

1: Self Mutilating Page

Start Assignment

- Due Monday by 11:59pm
- Points 10
- Submitting a website url or a file upload
- File Types zip, tgz, bzip, and gz

Using the power of JavaScript, we will handle user initiated events and modify the structure and content of the web page. Construct a web page that has some elements that a user can interact with when viewed in a web browser.

Requirements:

- Implement a handler for at least two different event *types*.
- At least one event handler should call `preventDefault` or `stopPropagation`.
- Provide a comment in that handler that explains why the call to `preventDefault` or `stopPropagation` is necessary.
- You must change at least one attribute of at least one element via JS.
- You must remove at least one element from the DOM via JS.
- You must create and add at least one element to the DOM via JS.
- Upload a compressed archive to Canvas containing the HTML file and any supporting files as needed to view locally (style sheets, JavaScript source, images, etc).

Suggestions:

- The theme of the page is entirely up to you, but I'm looking for something that is mildly cohesive such as a webpage calculator, a game board, or a note taking tool.
- This is meant to be a stand alone web page, so there is no need to worry about interacting with any back-end services or saving entered information.
- You may iterate this tool into your course project.
- You can do something completely unrelated to your project.

Important Note:

- You are still expected to write valid HTML

HW 2

Criteria	Ratings			Pts
Valid HTML and CSS Checked by https://validator.w3.org/  (https://validator.w3.org/) Links to an external site. and https://jigsaw.w3.org/css-validator/  (https://jigsaw.w3.org/css-validator/)	1 pts No Errors No errors reported	0.5 pts Some Errors Grader is merciful	0 pts Egregious Errors Did you even check your work?	1 pts
A for Affort This is your style bonus. It is completely subjective and may become a point of contention. However, it is completely off the table for discussion. If the grader feels the submission is exceptional, the grader gives the point.	1 pts I'm not even mad. I'm impressed.	0 pts It's fine You just have to say it.		1 pts
Event Handlers At least 2 event handlers for two different event types implemented and connected to the DOM.	1 pts >=2	0.5 pts 1	0 pts 0	1 pts
Prevent Propagation Used either `preventDefault` or `stopPropagation` in an event handler	1 pts Stopped a bubble	0 pts Let it go		1 pts
Explain Why Comment in code that explains why `preventDefault` or `stopPropagation` was needed.	1 pts Commented	0 pts No idea		1 pts
Attribute Modification Changed an attribute on an element as the result of an event.	1 pts Modified	0 pts Blank stare		1 pts
Element Removal Removed an element as the result of an event.	1 pts Removed	0 pts Blank stare		1 pts
Element Creation Created an element as the result of an event.	1 pts Created	0 pts Blank stare		1 pts

Criteria	Ratings		Pts
Element Attachment Added an element to the DOM as the result of an event.	1 pts Added	0 pts Blank stare	1 pts
I can make a tarball! All files needed are either included in the submission or is hosted on a valid website and are correctly linked. Seriously, students have submitted files with things like "<img src='C:\tmp\....'" in the past. Don't be that person.	1 pts Yippee!	0 pts •—•	1 pts
git Bonus Bonus point for including link to up-to-date git repository.	0 pts Full Marks	0 pts No Marks	0 pts
Team Penalty Half point deduction for each person in team.	0 pts Full Marks	0 pts No Marks	0 pts
Total Points: 10
